

# Presify Continues to Grow in the Global Energy Sector with Artificial Intelligence Solutions

*Presify Analitik Yazılım A.Ş., Ankara/Türkiye, December 2024*

## **New Era with Saves Partnership**

Saves Energy has partnered with Presify, a developer of artificial intelligence-based energy solutions. This strategic partnership is an important step for Presify to grow its technological and commercial ambitions in the energy sector.

## **Strong Cooperation in the Energy Ecosystem**

Saves Enerji, a group company of Nakkaş Holding, has a renewable energy portfolio of approximately 300 MWe/400 MWm of power generation and 100 MWh of stand-alone energy storage facilities with projects in Turkey and Romania.

Presify's current partner inavitas provides innovative monitoring and management solutions in the energy sector and supports Presify's AI-based innovations.

## **Presify's Growth Plans**

This investment will be used to support Presify's growth strategies, and the company aims to expand its existing teams with new competencies and move its AI solutions forward. The company will also continue to launch innovative products and services to address the different needs of the energy sector. Sales and marketing strategies will also be developed, enabling Presify's products to reach a wider customer base in the global markets.

## **The Leadership Role in Energy Intelligence Applications**

With this partnership, Saves will support Presify's innovative artificial intelligence solutions by transferring its experience in the field of digitalization in the energy sector, while inavitas, known for the digital transformation solutions it has brought to the energy sector in Turkey and around the world, will also play a critical role in shaping Presify's technological goals.

İbrahim Akgün, CEO of Saves Energy, stated that they named the new era of Saves as “Saves Trilogy/Trilogy” and that it covers the titles of production/asset management, energy trade and software, and that they brought a sustainable, efficient and digital approach to energy, and that they invested in a relationship and vision that will strengthen our fields of activity and carry us forward, believing that this cooperation will be an important step that will shape the future of the sector.
